

*Real Food. Real Energy. Real Good.*

We are a new smoothie shop location that strives to give our community healthy food options that are both delicious and made with only real food. Located in the Prime360 building on the corner of Stevens Mill Road and Court Street, we have the opportunity to bring in many customers who are looking to improve their overall lifestyle as well as those passing by in traffic from Minot Ave. We offer both smoothies and smoothie bowls made with only real ingredients, no powders or fillers, no ice, and no artificial sugars. With this, we offer a variety of add-ins that customers can choose from to amplify the health benefits of their smoothie or bowl such as whey protein powder, green superfood powder, collagen, chia seeds, flaxseed meal, hemp hearts, and many more.

Our planning board application requests the use of our existing outdoor window as a service window in the warm months. We currently have an indoor service window for both Prime360 members and the public, which at times can become congested with its location being the entryway of the building. With the outdoor service window, we would be able to provide easier public access by having a walk-up window to both order a drink or bowl from and pick up the order. We have a 17-space parking lot to accommodate the public and are hoping to create an outdoor seating area along our building as a place to relax and enjoy a smoothie or bowl in the

sunshine. By having the outdoor window, we could have a better business front that invites the public in to try out our products and promote our community-based and health-oriented mission.
